Response to Arguments

1. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claim 31 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 31, Applicant is claiming on page 8, in line 1, ***"periodically updating state from the one selected active"***, which is not clear to Examiner as to what Applicant is claiming. For example in claim one Applicant is updating state data, which is very clear. However, with respect to claim 31, the phrase ***"periodically updating state from the one selected active"*** is vague.

Allowable Subject Matter

1. Claims 1-30 are allowed over prior art.
2. The following is a statement of reasons for the indication of allowable subject matter: Although the prior art discloses providing multiple packet data serving nodes (PDSNs), wherein various states are recognized in a registration process they fail to

teach or suggest periodically updating state data from a selected PDSN to a selected PDSN that serves as a standby PDSN, and transmitting selected non-recoverable call information data from the selected PDSN to the standby PDSN responsive to any one of a predetermined set of update triggers.
